Experience

Android Developer at   MarkaVIP
Ekim 2014 - #u Anda (9 ay)

Senior Software Developer at   mobilike
A#ustos 2013 - Ekim 2014 (1 y#l 3 ay)

   As a Senior Developer at Mobilike, I was responsible for the Android and iOS mobile development. Some of
   my notable works include Seamless Display, native & interstitial advertisement SDK, that takes advertising
   beyond imagination with taking advantage of every aspect mobile has to offer, Seamless Player project,
   Vast 3.0 compatible video advertising SDK, that enables super dynamic advertisement creativity, and some
   mobile application develop, fix, polish, enhance...

Senior Software Developer at   Nomad Commerce
Temmuz 2013 - Ocak 2014 (7 ay)

   As a Senior Software Developer at Nomad Commerce, responsible for the Android and iOS mobile (UI, UX
   and code) development and consultancy for 3rd party companies.

Senior Software Engineer at   Dmobil
Haziran 2012 - Temmuz 2013 (1 y#l 2 ay)

   As a Senior Software Developer at Dmobil, responsible for the server-side and client-side (mobile and web)
   development. Some of my notable works include Social Call project, that removes "0 (123) 456 78 90"
   madness and enables us to call the real identities like "John Appleseed" from GSM, advertising system, that
   enables usage of multi adnetwork usage as well as custom micro adsites to promote company's products,
   several multiplayer game serverside implementations. I also did the whole mobile ecosystem (best practices
   for UI, UX, code) consultancy on Android and iOS to the graphic designers, developers including interns
   during my time there.

Freelance Mobile Developer at   Done
2011 - 2012 (1 y#l)

   As a software developer and application Consultant, developed an Android Activity called "Done HUB",
   which is designed for advertise other Android applications with providing abstract information and link to
   application related market. Also developed a mobile diagnostic tool project on Android OS for TTNET, a
   leading ISP of Turkey. Android client completely developed by myself with assistance of Done Labs. team
   for graphical content. Also, I did consulting for several algorithms on iOS platform.

Intern at Argela Technologies

Eylül 2010 - Aral#k 2010 (4 ay)

As a trainee, worked on Session Initiation Protocol (SIP) under supervision of Murat Parlak#s##k. Covered general knowledge about SIP, then analyzed the SIPp application source codes. Finally, developed scenario generator application for SIPp application.

Intern at DATAMARKET

Haziran 2009 - Temmuz 2009 (2 ay)

As a trainee, developed a software for warehouse, that inputs barcode codes of the goods into Microsoft CRM in .NET platform.
